KEYNOTE: Coalition of Child Care Advocates
\$10 per day plan
Sharon Gregson

WHAT MIGHT CHILDREN'S BEHAVIOURS
BE TELLING US?
Pam Collins

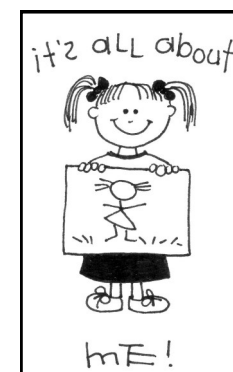

Do you ever wonder about those 'behaviours' that happen right out of the blue? They may not be so mysterious after all. Everyday we take information in from the world around us through our sensory systems: hearing, sight, smell, touch and our perceptions of motion, movement and gravity. How we process this information determines how we feel and respond to our social situations. Sensory and emotional regulation is the foundation for cognitive, communicative and other social skills! The morning session will focus on Sensory Systems and Emotional Regulation. This will be an interactive sessions with some opportunities to experience what some of our children experience in their bodies. The afternoon session will focus on determining what the behaviours are telling us. Come and learn about how to help our children learn to regulate and see if that helps some of those 'challenging' behaviours!

Pam Collins is the very proud parent of two very different thinking sons! She is also a Positive Behaviour Support Consultant/Parent Trainer for Reach Child and Youth Development Society. She is a recognized educational speaker for families and teaching staff of exceptional children. She is a co-founder of the Richmond Autism Interagency Committee – a group dedicated to increasing opportunities for people with autism to be accepted and celebrated in their community.
